

CAR DUSTBIN WITH GPS TRACKER AND AUDIO TRANSMITTER

Introducing our innovative Car Dustbin, a versatile accessory designed to keep your vehicle clean and organized while offering advanced tracking and communication features. Discreetly housed within its practical design is a powerful GPS tracker and live audio transmitter, providing you with comprehensive monitoring capabilities on the go.

This multifunctional car dustbin is equipped with cutting-edge technology, enabling real-time GPS tracking and live audio transmission. With the simple insertion of a GSM SIM card, you gain the ability to monitor your vehicle's location and listen to its surroundings remotely, ensuring peace of mind and security.

Whether you're ensuring the cleanliness of your car interior or enhancing your vehicle's security, our Car Dustbin offers a unique blend of functionality and discretion. Stay connected, stay informed, and drive with confidence, all with the convenience of a hidden GPS tracker and audio transmitter. Experience innovation on the road with JustMySafety.

****How to Use:****

1. ****Charging:**** Before initial use, charge the Car Dustbin using the provided charging cable until it reaches full battery capacity.
2. ****SIM Card Insertion:**** Insert a GSM SIM card into the designated slot in the Car Dustbin. Ensure that the SIM card has an active data plan for GPS tracking and live audio transmission functionality.
3. ****Placement:**** Place the Car Dustbin inside your vehicle, ideally within the car's interior, where it can discreetly monitor and transmit audio.

By following these steps, you can activate the GPS tracking and live audio transmission features, allowing you to monitor your vehicle remotely and listen to its surroundings when needed. Drive with confidence and stay connected with JustMySafety's innovative solution.
